The effect of particle size on the modulus of an epoxy/silica composite has also been studied. Spherical and irregular-shaped silica particles have different mean sizes in the range of 2–30 μm . Results show that the modulus remains constant with increasing particle size.

ABOUT THIS JOURNAL Welcome to the home page of Reviews of Adhesion and Adhesives (RAA) committed to publishing peer-reviewed and thought-provoking critical reviews written by subject matter experts covering all aspects of adhesion science and adhesive technology. Our aim is to publish your work efficiently and effectively as possible so the world is aware of it.

Bacterial adhesion is the initial step in colonization and biofilm formation. Biofilms can, on the one hand, be detrimental to both human life and industrial processes, for example, causing infection, pathogen contamination, and slime formation, while on the other hand, be beneficial in environmental technologies and bioprocesses.

Smoothed-particle hydrodynamics (SPH) is a computational method used for simulating the mechanics of continuum media, such as solid mechanics and fluid flows. It was developed by Gingold and Monaghan and Lucy in 1977, initially for astrophysical problems. It has been used in many fields of research, including astrophysics, ballistics, volcanology, and oceanography.

Janus particles are special types of nanoparticles whose surfaces have two or more distinct physical properties. This unique surface of Janus nanoparticles allows two different types of chemistry to occur on the same particle. The simplest case of a Janus nanoparticle is achieved by dividing the nanoparticle into two distinct parts, each of them either made of a different material, or bearing ...

Prof. Dr. Damjana Drobne is head of Bionanoteam, the Research group for nanobiology and nanotoxicology at the Biotechnical faculty, University of Ljubljana. With over twenty years of research experience, she is a full professor of Zoology and Toxicology, and the Vice head of the Department of biology. Her group Bionanoteam conducts research in large EU-funded research projects.
