the book "Robotics, Vision & Control" provides a detailed discussion (over 600 pages, nearly 400 figures and 1000 code examples) of how to use the Toolbox functions to solve many types of problems in robotics and machine vision.

Release 3 - Peter Corke

The practice of robotics and computer vision both involve the application of computational algorithms to data. Over the fairly recent history of the fields of robotics and computer vision a very large body of algorithms has been developed.
